Local Clinic Unveils New Therapy Laser Center

LEXINGTON, NORTH CAROLINA - DR. H. L. KWAN at 674 Radio Drive in Lexington announces the immediate offering of laser therapy in the Lexington and Piedmont Triad Area. The addition of this exciting and effective technology is part of Dr. Kwan's continued investment in advanced technologies and progressive procedures in the Chiropractic/Acupuncture/Pain Management field.

Laser therapy has been used effectively for many years, but advances in technology have produced “the next generation of laser therapy” with the new MLS (multiwave locked system) Therapy Laser, which uses specific wavelengths of light to treat painful and debilitating conditions such as back and joint pain, post-surgical recovery, arthritis, disc disease and sprains and strains just to name a few.

“We are very excited to be able to offer this new and dramatic treatment option to our patients,” said Dr. Kwan. “We have successfully treated patients with acupuncture therapy for the past 31 years with good results, but there are chronic or difficult cases that we believe will benefit from this new technology.” Laser therapy is painless, with treatments usually lasting several minutes, and most patients see positive results in just 1 – 3 treatments. “When a physical condition or injury affects mobility or quality of life, there is one goal: a rapid return to every-day activities. We now have the most advanced equipment on the market to deliver these results; results that includes very rapid disappearance of pain, strong anti-inflammatory effect, and immediate improvement of local blood circulation,” states Dr. Kwan. “More and more, our patients are looking for effective treatment options that are less invasive, have no side effects, provide rapid results and speed the healing process. Laser therapy provides us with an opportunity to meet the needs of our patients, and offer the highest levels of care possible.”

Dr. Kwan summarizes, “We pride ourselves on staying on the leading edge of technology, and educating our patients on the various levels of care available. Laser therapy is the future of the Chiropractic/Acupuncture/Pain Management industry, and we feel our patients deserve to have that option when choosing the best care for themselves.”

For additional information about laser therapy, contact the staff at Dr. H. L. Kwan at 336-249-6852. You can also read [Laser MLS Benefits](#).
